FOR IMMEDIATE RELEASE:

RENTON RETIREES CELEBRATE EARTH DAY

Local seniors plan to clean up a park and leave a greener planet for grandchildren

On Thursday, April 22, 2010, residents from Chateau at Valley Center retirement community in Renton will board a bus to clean up Gene Coulon Park from 10 am to 12 pm. This is a favorite park with the residents, who stroll through it during their monthly walking club.

Residents will be joined by employees of the Chateau to create for an intergenerational Earth Day Event. According to Activity Director Melissa Brown, "We can all learn something from each other about keeping our planet green---unique perspectives come with different ages."

Brown set up the Earth Day volunteer event with the City of Renton, and says that quite a large number of Chateau residents are looking forward to participating.
